MAGMA™

PCI PORTABLE EXPANSION SYSTEM

PORTABLE PCI EXPANSION SOLUTIONS FOR LAPTOP COMPUTERS

MAGMA is pleased to introduce the newest PCI expansion system the **1 Slot Portable PCI Expansion System**, the first generation of a truly portable chassis.

The new line of expansion systems promise to provide the various audio, video, satellite communications and other industries, a non-linear full-blown "on the road" workstation.

The 1 Slot is available in two models — Model CB1F accommodates a full-length PCI card and Model CB1H accommodates a half-length PCI card. All this potential is packaged in a tiny (5.45 W x 8.02 H x 1.70, Model CB1H) battery powered aluminum chassis that weighs less than 2.5 pounds, without customer card.

An external AC power supply (120V AC adapter, included) provides the ability to run off a wall plug. Because this system operates on 12-volt DC input power, users have the option to run off a car lighter adapter or any other 12-volt DC source.

1 Slot Chassis (Half or Full Length Card) with CardBus and Cable
